# Material Features

## HPL

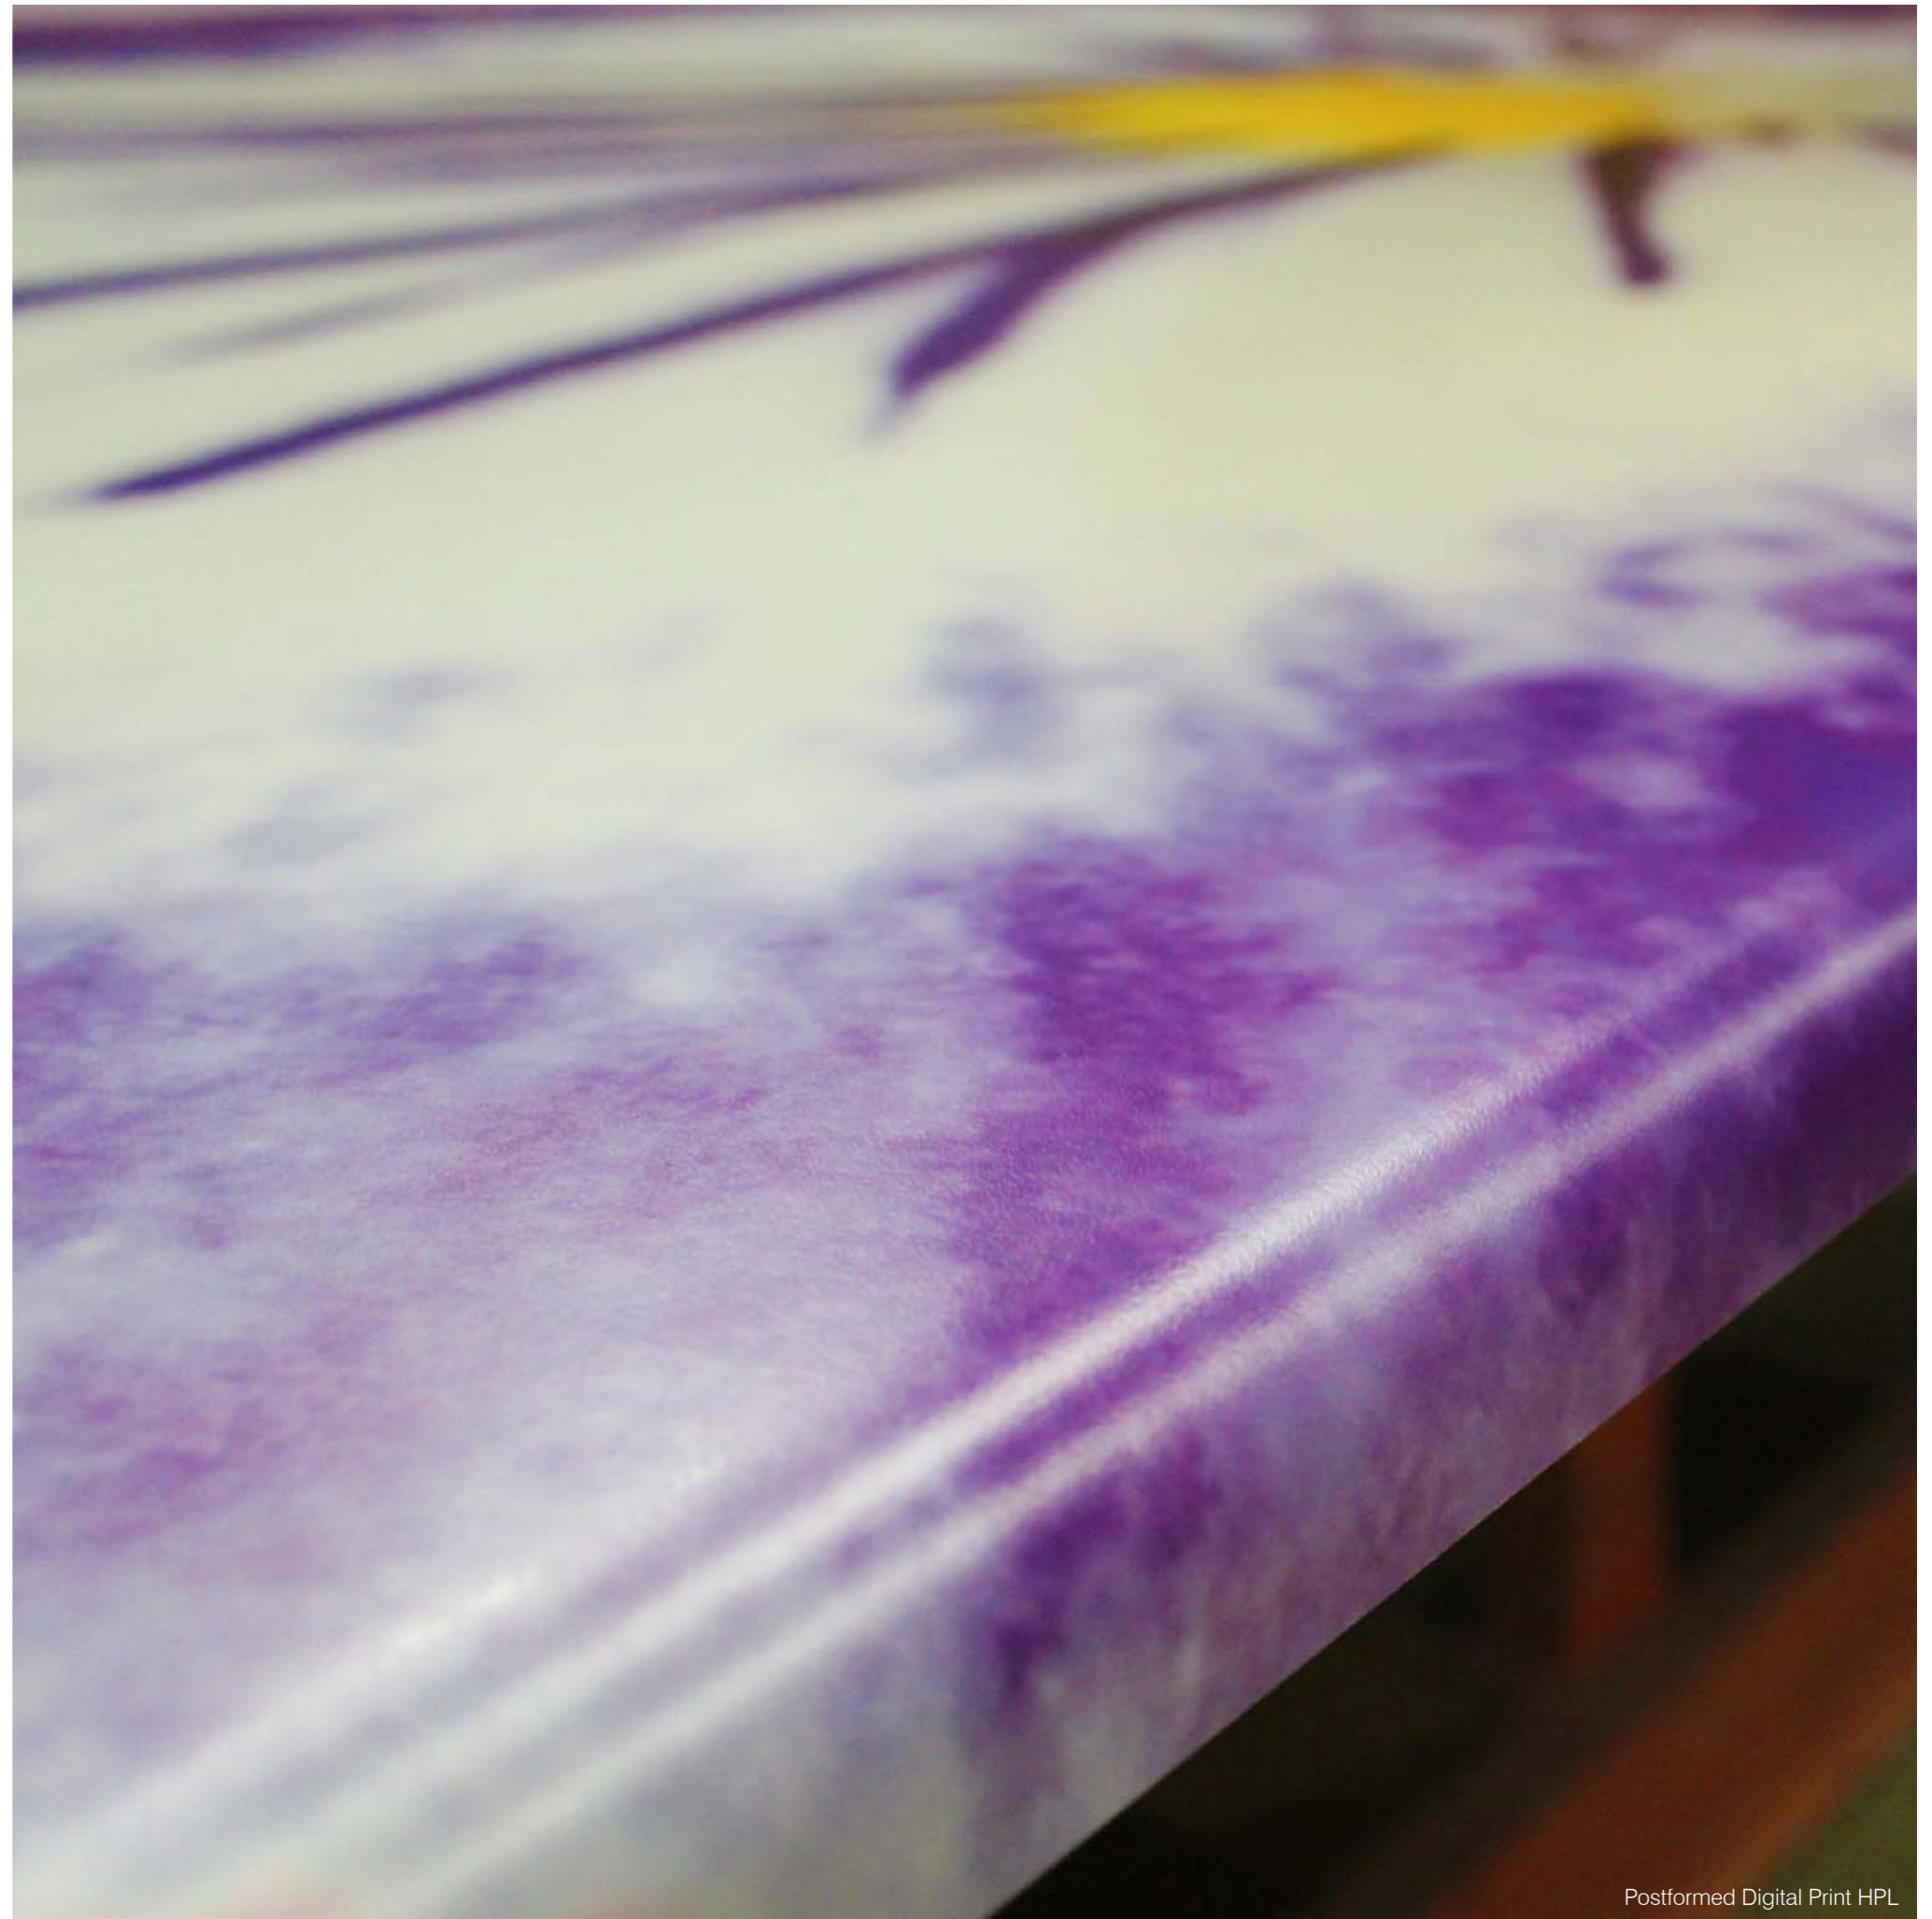

- Scratch resistant
- Impact resistant
- Abrasion resistance
- Heat resistant
- Crack resistant
- Ease of maintenance
- Hygienic surface
- Colour fastness in artificial light
- Resistance to cigarette burns
- Resistant to cleaning products
- Resistant to most chemicals
- Digitally printed surface

## Solid Surface

- Durable
- Versatile
- Non porous
- Through colour
- Inconspicuous joints
- Repairable surface
- Integral under mount sink
- Ease of maintenance
- Hygienic surface
- Colour fastness in artificial light
- Resistant to cleaning products
- Resistant to most chemicals

## Thermoplastics

- Impact resistant
- Fire retardant
- Resistant to cleaning products
- Resistant to most chemicals
- Wide variety of textures
- Wide variety of décors
- Extremely rigid
- Easily formed
- Scratch resistant

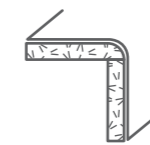

Postformed Digital Print HPL

# Compositions

As our Multiform™ postformed vanities can be constructed using multiple methods ensuring we cater for all project budgets, we have organised our vanity offer into three simple types all of which can include sink cut outs for either an inset or semi recessed sink.

## Traditional

Our Traditional Multiform™ is comprised using a moisture resistant MDF or chipboard core and finished with a HPL or thermoplastic decorative face. We recommend this top for light traffic, dry applications only.

## Durable

Our Durable Multiform™ is comprised using a SGL/ CDF core pieces that are finished with a HPL or thermoplastic decorative face. We recommend this top for medium traffic, dry applications.

## Ultimate

Our Ultimate Multiform™ is fabricated from solid surface. For use with vanities, we are able to include an integral under mount sink as well as downstand and upstand (if required). We recommend this top for high traffic, high end, wet, dry or humid environments.

# Profiles

We are able to offer you standard worktop profiles that cover a wide range of applications. As a bespoke fabricator if you need something unique then we are more than equipped to work with you. Our CAD team as well as your dedicated account manager will work with you to produce drawings to your exact details for you to sign off before manufacture\*.

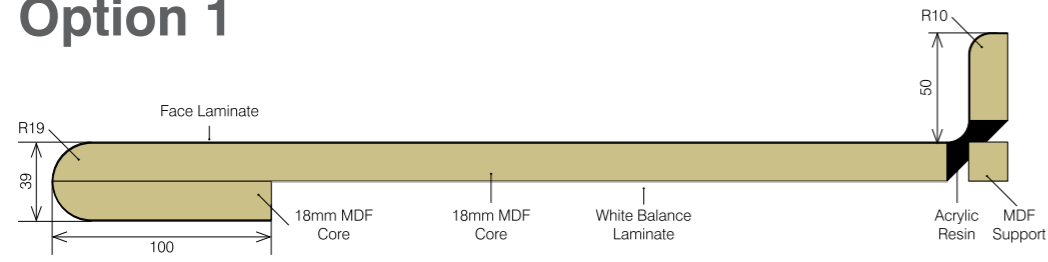

Due to material and manufacturing tolerances we are not able to guarantee matching profiles for applications over the maximum single length (3000mm for HPL, 3660mm for solid surface). Please state at the time of ordering if sections are to be jointed.

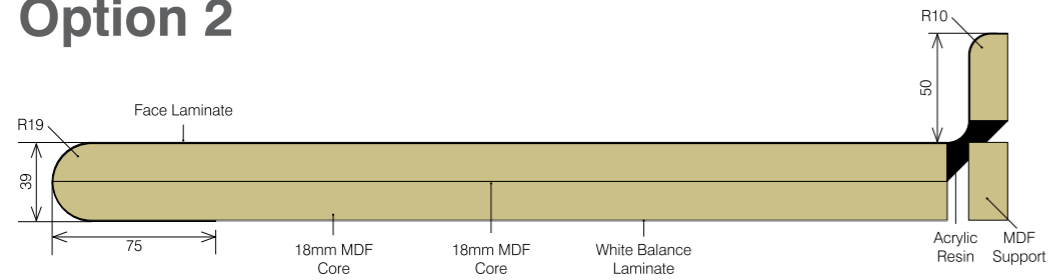

\* Subject to final approval and fabrication limitations.

# Green

We continuously ensure that all our supplied materials meet the environmental standards set by all the relevant bodies. We manufacture under the following standards: ISO:9001, ISO:14001, OHSAS:18001 and joint FSC® & PEFC Chain of Custody. We are proud to be the first manufacturer of our kind in the UK to do so under BM Trada.
