Bounce

The Bounce range is a fun shaped cubicle, designed for preschool children. The design creates a space that works for both the children and the nursery staff. Reduced height doors and partitions together with magnetic catches makes the children feel at ease as well as allowing the staff to supervise accordingly.

Available in two overall heights: Bounce without a headrail as standard, or full height with a headrail on request. The full height option has extended shaped partitions and comes with an alternate foot. Recommended when the room has an uneven floor.

For more details on the alternate options for the Bounce range, please see our technical data online or speak to our sales team.

Anti trap hinge

'U' bracket

Magnetic catch

Full channel foot

Specification

Overall Height
1300mm
